Projects

Zerodha Landing Page - I created a Zerodha landing page using HTML, CSS, and JavaScript. The HTML structure outlines the content, including sections for the header, features, pricing, and contact information. CSS is used to style the page, ensuring a visually appealing layout with responsive design for different devices. JavaScript is incorporated for interactive elements such as form validation, animations, and dynamic content updates. The landing page is designed to attract users with a clean and modern interface, showcasing Zerodha's services effectively.
